

MCP 2007 Vienna

Vienna, Austria | July 8-11, 2007

Comprehensive Coverage of Multiple Comparisons

- Adaptive and Sequential Designs
- Applications: Bioinformatics, Genomics, Clinical Trials
- Regulatory Affairs
- Bayesian Methods
- Decision Theory
- False Discovery Rate
- Multiple Endpoints Problems
- Nonparametrics and Resampling-based Methods
- Normal Theory
- Screening and Selection

Keynote: Peter Bauer, Medical University Vienna, Austria

Invited Speakers

- Alex Dmitrienko, Eli Lilly and Company, U.S.A.
- Sandrine Dudoit, Univ. of California, Berkeley, U.S.A.
- Gerhard Hommel, J. Gutenberg Univ. Mainz, Germany
- Mark van der Laan, Univ. of California, Berkeley, U.S.A.
- Daniel Yekutieli, Tel Aviv University, Israel
- Willi Maurer, Novartis Pharma AG, Basel
- James F. Troendle, National Institutes of Health, U.S.A.
- Joachim Röhm, Germany
- Joseph P. Romano, Stanford University, U.S.A.
- Sue-Jane Wang, FDA-CDER, U.S.A.
- Peter Westfall, Texas Tech University, U.S.A.
- Russ Wolfinger, SAS Institute, U.S.A.

Pre-Conference Short Courses (July 8, 2007)

Adaptive Designs for Clinical Trials

Werner Brannath, Medical University of Vienna
Frank Bretz, Novartis Pharma AG, Basel

Analysis of Multiple Endpoints

Alex Dmitrienko, Eli Lilly and Company, U.S.A.

Introduction to Multiple Comparison Procedures

Jason Hsu, The Ohio State University, U.S.A.

Workshop on the Analysis of Microarray Data

Katie Pollard, Univ. of California, Davis, U.S.A.

Further information: www.mcp-conference.org

International Organizers

Martin Posch, (Co-Chair)
Jason C. Hsu, (Co-Chair)
Frank Bretz
Guohua (James) Pan
Ajit Tamhane

Organizing Committee

Peter Bauer
Yoav Benjamini
Jie Chen
Alex Dmitrienko
Sandrine Dudoit
Helmut Finner
Anthony Hayter
Chihiro Hirotsu
Ludwig Hothorn
Armin Koch
Sanat Sarkar
Peter Westfall

Local Organizers

Franz Koenig
Martin Posch
